

For Global Justice!

The Climate catastrophe is the greatest single threat to all our futures, writes Claire James from the Campaign against Climate Change. The annual summit of all the countries which are part of the UN's climate change treaty is known as the COP (Conference of Parties). The '28' in 'COP28' means that this will be the 28th such event. Many climate campaigners were not even born when this process started.

We have to protest and act now to stop the emissions that are warming the planet, causing climate chaos.

After almost three decades of talks, global emissions are still increasing, temperatures rising and the impacts of climate breakdown multiplying across all continents hitting those who have done least to cause the problem the worst.

From 30 Nov to 12 Dec, this year's summit will be hosted by the United Arab Emirates, a country planning a massive expansion of oil and gas production, and with no record of respecting human rights. It will be presided over by Sultan Ahmed Al Jaber, head of their national oil company.

Action not Words!

Climate action is not delivered in negotiating rooms, by speeches or by setting distant targets, but by practical action. In the two years since the UK hosted COP26, the government has veered away from meeting its own climate targets. Rishi Sunak declared the UK should drain 'every last drop of oil' from the North Sea. He has rolled back climate policies and even allowed planning permission for a new coal mine.

Western Hypocrisy!

This hypocrisy is a double blow to climate action - not just the direct harm from UK emissions, but also the signal it gives to the rest of the world reinforcing the message that rich nations cannot be trusted, and undermining collective climate action.

Stop Oil Profits!

With climate disasters and record temperatures in the headlines, the general public are increasingly aware of the threat of climate breakdown, and also that our current energy system is broken, with ordinary people paying the price while oil giants net billions in profits and undermine collective climate action.

Extreme Weather Kills!

With climate disasters and record temperatures in the headlines, the general public are increasingly aware of the threat of climate breakdown, and also that our current energy system is broken, with ordinary people paying the price while oil giants net billions in profits.

Shut Down Fossil Fuels!

We have to move away from fossil fuels urgently, and this can benefit us all, building infrastructure like public transport, clean energy and warm homes rather than funnelling profits to corporations. To achieve this we need to broaden and strengthen our movement. Join us! www.cactu.org.uk/climatejobs

Climate Jobs:
Building a workforce for the climate emergency provides a details the need for millions of good, well paid, skilled jobs needed to urgently tackle the climate emergency, as the science demands we must break from the failed reliance on free-market involvement and instead ensure public investment in a huge expansion of jobs across all sectors from transport, energy and food to homes, education and more, which are essential to tackling the climate crisis.

At the heart of this, we argue, needs to be a **National Climate Service** which can organise, plan, train workers and deliver the jobs so urgently needed. These changes will improve our lives, ensuring among other things we have warm homes, a fully integrated public transport system and most importantly a safer climate and ecology now and in the future:

2.9C Baked-In!

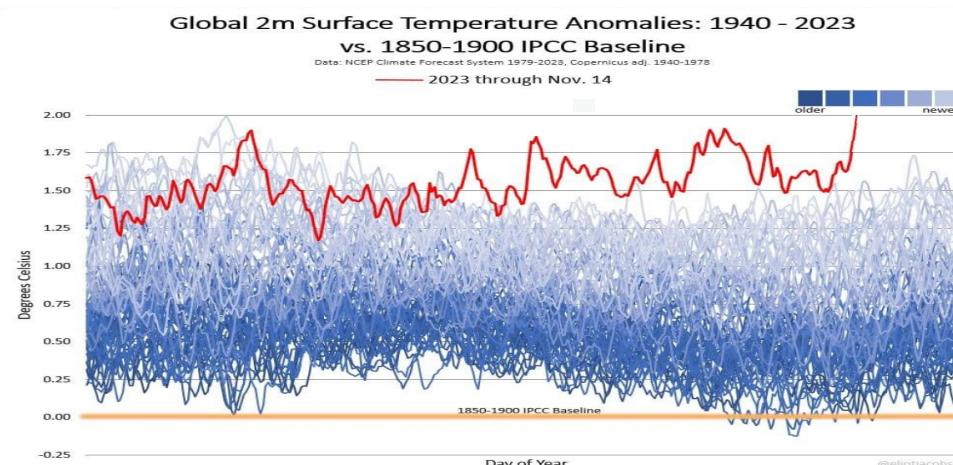

Newsletter of Plymouth Climate Council - Winter 2023

Average global temperatures reached 2 degrees Celsius above pre-industrial levels for a period of days in November 2023.

This has broken the target set by previous meetings of the UN Climate Conference - the Conference of Parties (COP) - of 1.5C. It means that, even if all emissions were stopped today, the average global temperature will reach 2.9C above base-level, threatening collapse of human societies across the world.

Corrupt Corporations and their paid-for Politicians putting Private Profit before People & Planet!
